User-Stories LeoForms

User

U1: As a user, I want to have an optimized user interface and user experience to increase efficiency and enjoyment when using the application.

Definition of Done:

The user interface and user experience have been optimized, including improved aesthetics, usability enhancements, performance optimization and user feedback consideration to ensure increased efficiency and satisfaction for users.

Surveyor

SU1: As a surveyor, I want to create a new survey with different types of questions in order to organise the school better

Definition of Done:

The surveyor is able to choose between different question types (radio, checkbox, text, ...) and ask the question in a text.

SU2: As a surveyor, I want to choose from survey templates in order to create recurring surveys fast

Definition of Done:

When creating a new servey, I get asked if i want to create my own questions from scratch or if I want to chose from a template (e.g. Wahlfächerauswahl)

SU3: As a surveyor, I want to send invitations to all the participants in order to get their responses easily

Definition of Done:

When I'm finished setting up my survey, I can create a link to send to all the people that I want to participate

SU4: As a surveyor, I want to see the results of a survey in order to realize the participants' wishes

Definition of Done:

When the deadline is over, I want to see a list of all responses and a graphical representation for easier interpretation

SU5: As a surveyor, I want to see who already sent their response in order to make sure the required amount of participants answered

Definition of Done:

While the survey is still going, I want to check who already answered the questions so I can make sure to contact those who still need to answer

SU6: As a surveyor, I want to see the results of old surveys in order to archive decisions by participants

Definition of Done:

After the survey is finished, I want it to be archived so I can check the results anytime in the future.

SU7: As a surveyor, I want to be able to create a course for templates in the frontend to efficiently handle recurring document courses.

Definition of Done:

When creating a template, I want to be able to define the course the survey takes through the specified Groups/Users.

SU8: As a surveyor, I want to be able to view the the document course of the dispatched survey.

Definition of Done:

As a surveyor, I want to be able to view the the document course of the dispatched survey. The surveyor can access the document course of a survey and observe the changes regarding the status of their uploaded survey.

SU9: As a surveyor, I want to upload surveys for following approval.

Definition of Done:

As a surveyor, I want to upload surveys for awaiting approval. When I'm done selecting a template, I want to upload the survey for following approval.

SU10: As a surveyor, I want to export an editable PDF-File from an existing PDF-Form.

Definition of Done:

As a surveyor, I want to export an editable PDF-File from an existing PDF-Form. When choosing from different types of PDF-Forms, I can export them as an editable file, for me to fill out later on.

SU11: As a surveyor, I would like to extract the data gathered from a completed survey.

Definition of Done:

As a surveyor, I would like to extract the data gathered from a completed survey. When a survey is finished, I want to get a downloadable summary of the filled out tasks with reference tot he completed survey

Student

ST1: As a student, I want to log into surveys easily in order to respond to surveys without wasting a lot of time

Definition of Done:

In order to participate, I want to click the link and get forwarded to a page where I can enter my "Matrikelnummer". This will send a link to my school-email-adress which I can use to login to the survey

ST2: As a student, I want to log in safely in order to have an accurate and authentic representation of my opinion

Definition of Done:

Due to the authentication-link getting sent to my personal email-address, nobody else should be able to access the link

ST3: As a student, I want to answer questions of a survey in order to represent my opinion in front of school administration

Definition of Done:

I want to be able to answer the questions intuitively and quickly. I can click to answer radio- or checkboxes or type to answer text or numerical questions

ST4: As a student, I want to get a reassurance of my answers in order to make sure that no mistakes were made

Definition of Done:

When I submit my answers, I want to get an email with all the questions and answers I gave.

ST5: As a student, I want to change my answers before the survey deadline in order to be able to change my mind

Definition of Done:

I want to be able to log back into the survey and change my answers before the survey deadline is over. Surveys can be accessed through the dashboard

ST6: As a student, I want to see the archive of my answers in order to have proof in case of a conflict

Definition of Done:

I want to see all the survey I have taken part in. These can be filtered (e.g. done/open/..) and display the answers I gave.

ST7: As a student, I want to be able to fill out PDF forms in the frontend to save time and ensure accuracy.

Definition of Done:

When taking a survey, I want to be able to fill out a PDF directly in the frontend.
